

POSTER LIST

Author	Title	
YUE, Xinjing	Biosynthesis regulation of epothilones in <i>Myxococcus xanthu</i>	P-01
HUANG, Fei	Functional and mechanistic insights into a prokaryotic RNA-guided argonaute protein	P-02
XING, Xin-Hui	High throughput breeding technologies for green biomanufacturing	P-03
TAKAGI, Masahiro	Visualization and evaluation of irritation induced by surfactants by dynamics of artificial cell membrane	P-04
YOSHIDA, Ken-ichi	Monitoring NADPH levels by luciferase luminescence in <i>Bacillus subtilis</i>	P-05
SHIN, Giyoung	Development of caprolactam-specific artificial RNA-based sensor by a coupled in vitro-in vino selection	P-06
HWANG, Yunhee	Development of improved coenzyme b ₁₂ sensor by integrating riboswitch and transcription repressor	P-07
NIU, Chenqi	A universal small molecular detection method	P-08
KONDO, Akihiko	Construction of novel metabolic pathways with artificial enzymes	P-09
SEKAR, Balaji Sundara	Production of natural 2-phenylethanol from glucose or glycerol by using coupled <i>Escherichia coli</i> strains	P-10
LI, Si-Yu	Rubisco-Rubisco activase interaction enhances the performance of <i>in situ</i> CO ₂ recycling in <i>Escherichia coli</i>	P-11
TAN, Shih-I	Quantification, regulation and production of 5-aminolevulinic acid in recombinant <i>Escherichia coli</i>	P-12
CHANG, Jo-Shu	An innovative combination of microalgae and leptin inhibitor as the feed attractant for juvenile orange-spotted grouper	P-13
LIU, Yung-Chuang	The use of <i>Alternanthera paronychiodes</i> extract as electron shuttle to enhance performance of microbial fuel cells	P-14
CHENG, Yu-Shen	Insect based biorefinery as a sustainable platform for converting renewable biomass feedstock into value-added products	P-15
CHEN, Po-Ting	Production of recombinant keratinase in <i>Bacillus subtilis</i> using the piggy wastewater as nutrient source	P-16
ASUN, Cherilyn Arlene	Evaluation of γ -aminobutyric acid (GABA) production by <i>Bacillus subtilis</i> BBEL02 using alternative carbon sources from wastes	P-17
CHEN, Shan-Yu	Immobilization of glutamate decarboxylase (GAD) for GABA production	P-18
CHEN, Ming	Amide synthesis via aminolysis of ester or acid with an intracellular lipase	P-19
XIN, Ruipu	Investigation of styrene oxide isomerase to extend its application scope for chemical synthesis	P-20

ZHANG, Teng	A novel β -glucuronidase from <i>Talaromyces pinophilus</i> Li-93 precisely hydrolyzes glycyrrhizin into glycyrrhetic acid 3-O-mono- β -D-glucuronide	P-21
WEI, Yu-Hong	Exploring useful fermentation strategies for the production of ectoine using <i>Marinococcus</i> sp. YZUE2	P-22
CHEN, Chun-Yen	Fermentation strategies for enhanced astaxanthin production using an indigenous <i>Aurantiochytrium</i> sp. UA-6 strain	P-23
HUANG, Chi-Yu	Highly efficient methane mitigation by novel type-I methanotroph <i>Methylomonas</i> sp. THUA isolated from rumen	P-24
LOH, Wai Leng Carmen	Implementation of different fermentation strategies to enhance the production of microbial carotenoids from <i>Gordonia terrae</i> TWRH01	P-25
CHANG, Yu-Kaung	Fabrication and characterization of antibacterial efficacy of quaternized chitosan/poly (vinyl alcohol) nanofiber crosslinked with blocked diisocyanate	P-26
YU, Chi-Yang	Surfactant-assisted in situ transesterification of wet <i>Rhodotorula glutinis</i> biomass	P-27
WU, Yun-Chen	Unraveling interactive characteristics of microalgal metabolites upon bacterial populations in microbial fuel cells	P-28
